

# Rethink Your Drink

One way to cut calories is to think about what you drink. Drinks don't fill you up the way food does. And, as you can see below, calories from drinks can really add up!

But here's the good news: If you replace drinks that are high in calories with drinks that have low or no calories, you can save 730 calories a day!

## Drinks and Weight Loss

If you need to lose weight, experts recommend trying to lose weight at a rate of no more than 1 to 2 pounds per week. Most people need to cut roughly 500 calories a day to lose 1 pound per week. Cutting the calories in your drinks can help you reach this goal.
